Employer's website	**www.themobilereality.com**

We are creating a Mobile Reality! We are small by design and focused on creating profitable digital products and transforming data into profit. We are specializing in a few core technologies React.JS / React Native / Vue.js / Node.JS / Amazon Web Services. These technologies are always our first choice. We are doing the most interesting projects for clients from all over the world.

Our office is located in Warsaw, but we work 100% remotely.

We need people and want to boost our team of backend and front developers. Are you looking for work in a team of experienced devs in E2E projects? Don't hesitate to contact us!
