Employer's website	<b><a href="http://join.unitedrobots.co">join.unitedrobots.co</a></b>

---

United Robots is a **proprietary robotic designer and manufacturer** which aims to revolutionize industrial space maintenance with its autonomous robots. We've reinvented, designed and built **autonomous mobile robots (AMRs)** conceived for vast storage area operators i.e., hypermarkets, warehouses, sorting offices or public spaces such as shopping malls, airports or hospitals. Our products are a working example of the expertise in **mobile localization, machine learning and computer vision** which convert machines into **intelligent AI devices** capable of working **without human supervision**. We are looking for **robotics geeks** who will share our excitement and help us to win the run leading to the world where intelligent robots will be as popular as mobile phones.
